35°	245	350	455	560	665	145
40°	279	405	531	657	783	145
45°	318	468	618	768	918	145

**All measurements must be checked on site prior to installation.**

### Important Set Out Notes:

- In all cases gable end will require a packer under rafter to accommodate the various pitches (D).
- Soffit bearer fixed to right hand side of the rafter, looking at the building.
- To ensure birds cannot enter the roof space leave the bottom purlin off until fascia has been installed.
- Based on minimum purlin thickness of 45mm.
- A 10mm soffit clearance has been allowed for.
- 185 Multifit Big Panel Fascia System is suitable for use with longrun roofs with sloping soffits up to 35°.
- Soffit bearers are required on all hip corners.

### Important Product Notes:

- Store product securely on site away from incompatible materials and protect from wind and operating machinery.
- Product surface protected with plastic film should be stored under cover, away from u/v light, and film removed immediately after installation.
- It is a requirement of the products warrantee to obtain and thoroughly read a copy of Roofing Industries handling, storage and installation guide. Available from the supplying branch or alternatively from [www.roof.co.nz](http://www.roof.co.nz)

### Steps To Follow:

- Inform precutter that Multifit External Fascia is being used.
- Keep in contact with the authorised installer in your area of progress/when ready for installation.
- Multifit fascia can be installed to other fascia system set outs, only by a few simple steps. Contact your local installer or Roofing Industries.
