

## **Roofing Industries Sustainability Policy**

As a national group, Roofing Industries recognises the importance of a sustainable approach to our operations across the entire operation, from roll forming and the distribution of products to our various customers.

At Roofing Industries it is our objective to build sustainability in with what we generally consider to be 'good' business practices, such as increased efficiency, minimising waste and maximising resources.

Sustainable business practices are a way to lead our group and are applied across all aspects of our business - from administration, roll forming to waste disposal.

Roofing Industries is moving towards utilising Environmentally Sustainable practices across all our operations. We undertake to educate our employees, suppliers and customers on our Environmental Sustainability vision.

### **Introduction:**

The object of this policy is to provide clear direction for the Roofing Industries Group efforts to operate in a sustainable manner.

### **Policy Statement:**

We are committed to reduce our environmental footprint and working proactively to respond to local and global sustainability issues. We recognise that sustainable practices need to be embedded in the way we think and work, and we believe that this will contribute to long term business success.

We will:

- Implement programmes that improve our energy efficiency and reduce our CO2 emissions.
- Reduce waste and recycle waste materials where possible.
- Improve our water/energy efficiency.
- Support industry education on sustainable practices, design principles and measures (RANZ, NZMRM).

### **Roofing Industries Environmental Policy**

We are committed to working with industry and regulatory bodies to protect the environment by reducing the environmental impacts associated with our manufacturing, distribution and use of our roofing/cladding materials.

We will:

- Ensure that we comply with any Environmental regulatory standards.
- Commit to implementing measures to prevent pollution and waste.
- Regularly review and report on our environmental performance where appropriate.

### **Roofing Industries Product Stewardship**

Roofing Industries is committed to responsible life cycle management for our metal roofing products.

Accordingly, we will take back **used** metal Roofing Industries products for recycling (see Notes below).

If you are looking to return used metal product please contact your local Roofing Industries branch directly to discuss with us, **prior** to dropping it off.

Note:

- Roofing Industries reserves the right to refuse any returned product, for example, if no prearrangement for drop-off has been made with the local office.
- Roofing Industries will not pay for any returned product and will not organise for the collection of any eligible product to be returned.
- This applies only to used Roofing Industries metal products suitable for recycling
