

CPD Presentations

Roofing industries is focused on providing ongoing support towards the continuing education of specifiers. Accordingly, industry-experienced architectural representatives have been specifically employed to both prepare and deliver CPD point presentations, and to provide assistance with appropriate product specification.

As our commitment to further education within the industry we are pleased to be a national sponsor for the Architectural Designers of NZ and an approved CPD provider to NZIA members.

Please do not hesitate to contact us to arrange a pre-approved seminar or CPD point's presentation. As familiarisation support, we also welcome organised factory visits to witness the very latest in roof and cladding manufacturing technology
