

Roofing with Style

Roofing Cladding Rainwater Systems

Practical residential roofing & cladding solutions – innovative products
www.roof.co.nz

OCTOBER 2012

Roof and wall natural lighting

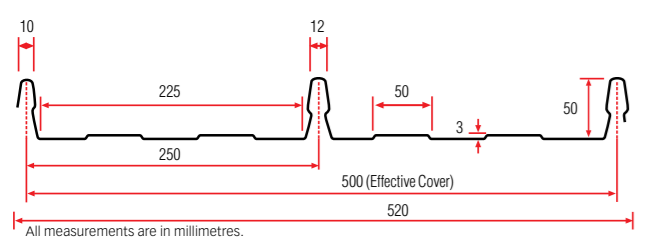

Why not utilise the knowledgeable staff at Roofing Industries to assist you in choosing the appropriate translucent and transparent products for your project.

- Choose from:
- Polycarbonate
 - Glass Reinforced Polyester
 - Multiwall

MULTIDEK®

Possibly the most underestimated residential roofing product on the market, and yet if you examine the clean European lines, architectural flexibility and couple this with a completely hidden fixing system (no need to penetrate the roofing), why would you not consider this practical and attractive alternative?

SPECIFICATIONS		
Sheet width: 520 mm	Sheet coverage: 500 mm	
Sheet length: Any length (subject to transportation)	Minimum pitch: 3°	
SPAN TABLES (Steel Substrate Material)		
Type of Span	Maximum Span (Metres)	Maximum Span (Metres)
	.48 mm BMT	.55 mm BMT
Intermediate	1.600	2.500
End	1.100	1.600
Note: Maximum design load 2.0kPa		

• For loadings greater than 2.0kPa, consult Roofing Industries or visit www.roof.co.nz
Multidek® Manufactured in Auckland – additional freight may be applicable outside of Auckland.

Rainwater Systems

Simply select a rainwater product, along with one of the wide range of substrates and surface finishes, in order to complete and enhance your project.

Gutters, Downpipes & Fascia

R.I. 125 mm Box Gutter

The R.I. 125 Box Gutter is designed to perform where heavy rainfall intensity may occur. A higher face prevents unsightly views of the end of the roofing sheet, particularly on higher ribbed profiles.

Quarter Round

Quarter Round Spouting maintains its traditional appeal, and provides simplicity and classic lines for use in most residential applications. Supplied with internal or external brackets.

1/2 Round

Well proven, and recognised as an aesthetically pleasing spouting product. 1/2 Round will certainly enhance the overall appeal of your home. Supplied with external brackets.

Old Gothic

Old Gothic, which is available in two sizes, is reminiscent of the spouting types used on colonial homes. Old Gothic is supplied with internal or external brackets.

J Line

An extremely popular spouting system which utilises an extended sloping face to hide the end of the roofing and is particularly beneficial for use on low-pitch residential applications. Supplied with internal brackets.

Multifit™ Fascia

Multifit™ Fascia can be used in conjunction with a wide number of roof types by incorporating a simple attachment system, allowing removal and re-installation without disturbing the main roof material.

Downpipes

Available in 65 mm, 80 mm and 100 mm sizes, and supplied in varying lengths to meet requirements.

Practical roofing & cladding solutions

Innovative products

CORRUGATE

Corrugate remains an ageless icon, and as a cost competitive and trend setting roofing and cladding material, continues to gain in popularity.

Corrugate offers a stylish alternative to today's building designers and home owners alike, allowing creative flair and individuality during the design process. Product capability along

with a little imagination will ensure a distinct point of difference to other homes in the vicinity. Choose from unpainted Zinalume®, Galvanised, ZAM™, Aluminium, Copper, Stainless Steel, perforated,

or an extensive range of **COLORCOTE®** and **COLORSTEEL®** pre-painted modern roof finishes meeting individual requirements.

Wide Corrugate Manufactured in Auckland – additional freight may be applicable outside of Auckland. Manufacture of wide corrugate is subject to minimum quantities.

SPECIFICATIONS	
Sheet width: 845 mm & 1100 mm	Sheet coverage: 762 mm & 995 mm
Sheet length: Any length (Subject to transportation)	Minimum pitch: 8°

SPANS: When considering purlin and girt spacing it is important to follow due process as follows: If a building is being designed and constructed in full accordance with E2/AS1 of the NZ Building Code and the products to be used are covered by that document, then it is a requirement that both design spans and fastener patterns comply with E2/AS1.

However, it is also appropriate that as a manufacturer, Roofing Industries may provide more optimum spans and appropriate fastener pattern and we do recommend this option. Please contact your local Roofing Industries branch or, for a further understanding, please refer to the relevant product Profile Technical Summary data sheet available from our website.

SLIMLINE® Mini Corrugate

A miniature version of the Corrugate roofing product, Slimline® offers a decorative alternative with a wide range of uses, including a perforated acoustic sheet.

Slimline® is particularly suited for projects such as internal and external wall partitioning, cladding, fencing, soffits, ceilings, and some curved applications. Choose from unpainted Zinalume®, Galvanised or an extensive range of **COLORCOTE®** pre-painted modern roof finishes.

SPECIFICATIONS	
Sheet width: 840 mm	Sheet coverage: 815 mm
Sheet length: Maximum 8 metres	

ALLOWABLE SPANS		
THICKNESS	END SPAN	INTERMEDIATE SPAN
.40 mm BMT	0.600 mm	0.600 mm
.55 mm BMT	0.600 mm	0.800 mm

- Slimline® is not designed as a trafficable roofing product.
 - For further spanning and installation advice, contact Roofing Industries.
- Slimline®** Manufactured in Auckland – additional freight may be applicable outside of Auckland.

RIBLINE®

Whilst aesthetics and overall appearances remain a powerful motivating factor during selection of roof type, of equal importance is the ability of the roofing product to prevent water leakage, particularly on lower pitch roofs.

Ribline® is manufactured with a unique capillary-preventing edge lap and offers the best of both worlds by providing the home owner with security against water leakage, and a modern attractive roof finish. With 800 mm sheet coverage, Ribline® offers the consumer, less laps,

reduction in the number of fasteners required, faster installation and ultimately, reduced costs. Ribline® can also be supplied as an extra-wide 960 mm coverage sheet. Choose from unpainted Zinalume®, Galvanised, ZAM™, Aluminium, Copper, Stainless Steel or an extensive range of **COLORCOTE®** and **COLORSTEEL®** pre-painted modern roof finishes meeting individual requirements.

Ribline® Manufactured in Auckland – additional freight may be applicable outside of Auckland.

SPECIFICATIONS	
Sheet width: 890 mm & 1030 mm	Sheet coverage: 800 mm & 960 mm
Sheet length: Any length (Subject to transportation)	Minimum pitch: 3°

SPANS: When considering purlin and girt spacing it is important to follow due process as follows: If a building is being designed and constructed in full accordance with E2/AS1 of the NZ Building Code and the products to be used are covered by that document, then it is a requirement that both design spans and fastener patterns comply with E2/AS1.

However, it is also appropriate that as a manufacturer, Roofing Industries may provide more optimum spans and appropriate fastener pattern and we do recommend this option. Please contact your local Roofing Industries branch or, for a further understanding, please refer to the relevant product Profile Technical Summary data sheet available from our website.

TRIMRIB®

Utilising the very latest in rollforming technology, Trimrib® can be manufactured as either Trimrib® (S) single swage, Trimrib® (TS) twin swage, or Trimrib® (V) two "V" swages.

SPECIFICATIONS	
Sheet width: 820 mm	Sheet coverage: 760 mm
Sheet length: Any length (Subject to transportation)	Minimum pitch: 3°

SPANS: When considering purlin and girt spacing it is important to follow due process as follows: If a building is being designed and constructed in full accordance with E2/AS1 of the NZ Building Code and the products to be used are covered by that document, then it is a requirement that both design spans and fastener patterns comply with E2/AS1.

Each profile is aesthetically pleasing, having been designed with modern building style in mind and creating contrasts of light and shade in straight lines. Trimrib® enables rapid water shedding from the roof with a low minimum pitch requirement of 3 degrees and when coupled with or without one of the pre-painted surface finishes, Trimrib® ensures the completed project provides purpose and visual appeal. Choose from unpainted Zinalume®, Galvanised, ZAM™, Aluminium, Copper, Stainless Steel or an extensive range of **COLORCOTE®** and **COLORSTEEL®** pre-painted modern roof colours in order to meet individual requirements.

Trimrib® (S) and Trimrib® (TS) Manufactured in Auckland, Taupo, Palmerston North and Christchurch. **Trimrib® (V)** in Taupo and Palmerston North – additional freight may be applicable outside of these areas.
